Re: MB Docket No. 15-149

Dear Chairman Wheeler:

As Mayor of Grand Prairie, Texas, I am proud to promote measures that encourage economic development and a prosperous future. We are a diverse community that has grown immensely in the last couple of decades. We need a cable broadband operator that offers residents and businesses fast connections and affordable prices. I believe the merger of Charter Communications, Time Warner Cable and Bright House Networks would bring the best services to my community, and I ask that its merger be approved.

New Charter would prioritize customer care by offering the latest technology to all consumers. The products would include high-speed broadband, including the fastest entry-level speed on the market. At 60 Mbps, this package would actually be less expensive than many competitors' offerings, and it would ensure customers could stream from multiple devices at one time.

New Charter would also work to bring customers the latest innovations, like full digitization, cloud-based technology and out-of-home WiFi hotspots. In addition, it would cater to customers interested in diverse programming, offering the largest tier of Hispanic channels on the market. Each of these measures expresses a commitment to consumer needs and quality customer care.

I believe my community would appreciate and benefit from New Charter's variety of products. I support this merger with the anticipation that both the community and consumer benefits are financially feasible for all stakeholders involved. I ask that you reflect on the merits of the merger and join me in support.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ron Jensen", is written over a blue horizontal line.

Ron Jensen
